

TOTAL PRINT MANAGEMENT

WITH TOTAL PRINT MANAGEMENT (TPM) WE CAN TAKE AWAY THE HASSLE AND STRESS OF MANAGING INTERNAL PRINT NETWORKS AND HELP TO REDUCE FINANCIAL COSTS AND THE CARBON FOOTPRINT ASSOCIATED WITH YOUR PRINT AND COPY FLEET.

WHAT IS TPM?

TPM is an integrated solution of hardware, software and services that optimises and manages a fleet of single or multifunctional devices (MFDs), reducing costs by up to 40%, whilst improving productivity and asset utilisation.

Total Print Management is Altodigital's approach to simplifying and enhancing your print operations. It's a full life-cycle programme that assesses your current infrastructure, recommending process and equipment changes to improve your operations and providing impeccable after-sales support.

BALANCED DEPLOYMENT FOR AN OPTIMISED INFRASTRUCTURE

Altodigital is firmly committed to balanced deployment. Although the convergence of print and copy technology makes multifunctional devices (MFDs) economical and efficient, we will propose an appropriate mix of MFDs and printers, departmental and personal devices, or colour and mono machines to suit your organisation. One size does not fit all.

PRINT AUDIT

Our first task is to conduct a print audit. This highly automated procedure identifies the printers and copiers in your organisation, how many pages they produce, what proportion of colour you print, how often you order supplies and allows us to generate an accurate picture of what your document operations currently cost.

IMPROVE INFORMATION WORKFLOW

The advanced scanning capabilities of MFDs can be used to digitally capture paper documents, send them to a recipient or store them. Integrated delivery solutions can assist with regulatory compliance and reduce errors.

MANAGING THE PRINTING & IMAGING ENVIRONMENT

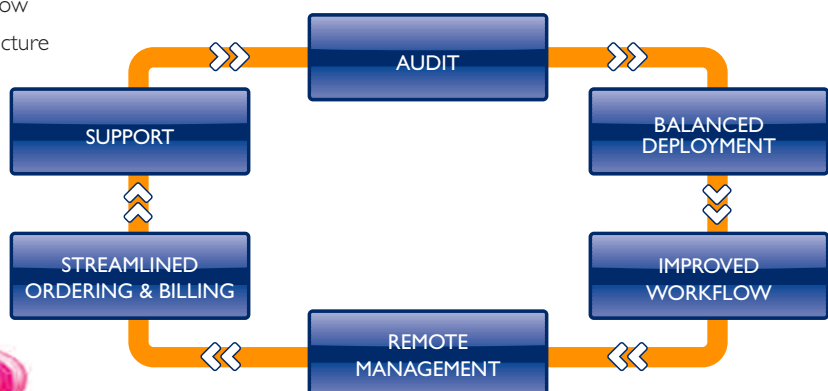

By remotely managing your systems, Altodigital can track usage, maintain appropriate security, help support users and highlight developing problems. Your staff can work more productively and your IT department is released to other tasks.

STREAMLINED ORDERING & BILLING

Instead of numerous staff ordering supplies on demand, a managed service delivers them just before they are needed, eliminating downtime, reducing costs and simplifying procurement.

CONSTANT ASSESSMENT

By regularly repeating the audit process, Altodigital can quantify cost savings, adopt technology improvements and adapt to changes in your organisation.

CONTINUED FROM OVERLEAF

TOTAL PRINT MANAGEMENT PROCESS

If you are still using old technology or operating on uneconomical purchase or lease contracts, you will undoubtedly be paying more than you need to and will be performing far less efficiently than you could be.

Through our efficient TPM process outlined below, we can identify how to reduce the financial costs and the carbon footprint associated with your print and copy fleet.

DEVELOPING THE STRATEGY

- Assess current spend.
- Identify device location.
- Produce a detailed total cost of ownership report.

DEPLOYING THE SOLUTION

- Select correct device type and software package.
- Rationalise the number of devices and device types.
- Remove expensive and tired printers.
- Identify cost-effective areas where current fleet can be maintained.

MANAGING THE DEPLOYMENT

- Offer ongoing proactive account management.
- Introduce remote management software.
- Ensure a high level of service and support.

WHAT NEXT?

At Altodigital we're committed to introducing our clients to a world of greater copy and print efficiency, improved cost-effectiveness and environmental compliance.

A single phone call or e-mail is all it takes to get the ball rolling and we will be happy to come along to discuss – without obligation – how we can help you to achieve your goals.
